Hi Michelle,

I converted that Json file to an Excel file. Please find the attachment. Feel free to let me know if you have any other questions.

Thanks,  
Xuanyi

**Subject:** RE: STICS

Hi Xuanyi,  
I can open it in Excel but I cannot get it to break into columns with the "Tab" and "Comma, or of the choices.

Yes, you can open it in Excel. Excel's "Text Import Wizard" will be popped up automatically, then choose "Delimited" in step 1 and click "Tab" and "Comma" in step 2. Json file should be read entry by entry in Excel after the final step.

Best,  
Xuanyi

Thanks – that was fast.

Is there a way to parse this file into columns – something that I can slap into Excel and read entry by entry?

Michelle

No problem, Michelle. Please find the attached JSON file which contains all the raw data crawled from OpenSWMM. This file can be opened by using notepad.

Thanks,  
Xuanyi

Xuanyi,

Can you send to me the raw data from OpenSWMM. EPA needs it in a database.
